# solidian Primafloor

do it right the first time!  
think quality!

[solidian.com](https://solidian.com)

rusty buildings  
should be my  
future?  
no thanks!

**build solid.**

Non-corrosive properties of our reinforcements contribute to long-lasting durability, savings in future repairs and maintenance costs. Build it for next generation!

**build solid.**

With solidian reinforcements you can build ultra-lightweight and more sustainable structures. Compared to classic steel reinforcements we provide superior strength (up to 7 times stronger than steel).

**solidian**  
Primafloor

# CRACKS ARE NOT AN OPTION

## features

- Eliminates screed cracks during 28 days of drying and curing
- Easy installation on site as it comes in roll
- Perfect for terrace, balcony, garage, gym, garden, workshop, hall, office, industrial or even heavy-duty flooring
- saving time and money as you won't have to repair your floor again

 Superior Bonding	 Chloride-Resistant
 Lightweight	 Anti-crack
 Quick Installation	 Non Corrosive
 Easy handling	 Lower maintenance cost
 Easy cutting	 Lower transport cost

**solidian Primafloor**  
NO Corrosion / NO Crack

Glass reinforcement can solve old problems with new solutions.

## About **solidian**

Always one step ahead with innovative products we can offer you perfect solutions for your needs

solidian has made a name for itself as a leading company that provides a wide range of solutions to improve construction structure.

We made a commitment to clients to provide them with customer service, technical support and being the leader in providing global innovative fiber material solutions. We use advanced technologies to produce special solutions according to your needs. Our functional grids are used to optimize product and processing properties in a wide variety of applications – including concretes, UHPC, cement-based mortars, adhesives, and dry-mix compounds.

## Other Products

check out our website for more products and innovative solutions

**solidian eGRID**

Specially developed flexible grids in combination with electro conductive coatings provide high tensile strength and outstanding electro conductive properties. **solidian eGRID** is now also available with different conductive surface treatments for special applications in which electrical conductivity is important.

**solidian Anticrack**

is a further development of our reinforcement **solidian GRID**, which functions specifically as crack-eliminating reinforcement. The carbon reinforcement can be laid close to the surface and thus has a particularly positive influence on crack formation in concrete components.

**solidian CONNECTOR**

Non-corrosive Carbon, Basalt, or AR-Glass connector with Single or Double Open End suitable for construction reinforcement in masonry, arches and vaults. Perfect for reinforcement of buildings in earthquake-affected areas.

**solidian Brksy**

High-tech, non-Corrosive, AR glass or Carbon fiber reinforcement brick mesh on a roll for efficient crack control specially designed for any wall width.

**solidian REBAR**

The rod-shaped reinforcement **solidian REBAR** is combining high-strength fibers with extreme resistant resins. **solidian REBAR** is the right choice where ever high loads occur and components are permanently exposed to aggressive environmental influences.

**solidian REMAT**

The **solidian REMAT** transfers all the outstanding properties of our bar-shaped reinforcements, the **solidian REBAR**, to the mesh format. The result is robust and walkable mats for more efficient handling on the construction site.
